Recommendation on Bid for Inspection & Cleaning of Drinking Water Reservoir

Bids were received from nine (9) vendors on March 19, 2012.

Bids were reviewed and evaluated by:

- Jimmy Black, Water Department
- Ricky McDaniel, Water Department

Committee recommends award to Southeastern Underwater Services, Inc. as the lowest and best bid.

The work involves an inspection and then cleaning of the underground tank. The amount of sediment to be cleaned is estimated to be approximately 3 inches. However it will not be known until the work is performed. The amount of sediment will determine the final cost.

Their proposal is \$1,900.00 for the inspection and removal of up to two (2") of sediment. Each additional inch of settlement will cost \$400.00.

Request Board approval for award to Southeastern Underwater Services, Inc. with expected cost of \$2,300.00 but approval of rates stated and cost based on actual sediment removed.
