

AREA 1 - PROGRAMMING

The western portion of Area 1 is designed for programs that respond to Millington's needs including 5 multipurpose fields and an amphitheater. The eastern portion is made up of existing woodlands and wooded wetlands, so the programming is much more passive.

AREA 2 - PROGRAMMING

Playing off of the open water and wetlands that are prominent in Area 2, programs that are related to natural education and recreation are located around a central hub with a future nature center. Trails connect to both Areas 1 and 3.

AREA 3 - PROGRAMMING

Area 3 contains mostly passive programming due to its large expanses of sensitive Wetland Typologies as well as its distance from hubs of activity. Different types of trails are organized around landform features, such as berms, oxbows, and wetlands.
